Free climate event: A Flurry of Changes

How climate shifts impact snowfall, glaciers and the way we live, work and play in the Pacific NW

What if reduced snowfall means less winter recreation for skiers and snowboarders? What if our Cascade mountain glaciers disappear for good?

The Climate Trust, in collaboration with KEEN Footwear, is offering a free event that explores how climate change is leading to significant changes and losses in glaciers and snowpack that will have a strong impact on how residents of the Pacific Northwest live. The resulting changes in stream flow and water shortages will affect all Oregonians, from farmers in eastern Oregon, to kayakers on the Clackamas River, to Willamette Valley residents who rely on drinking water from snow-fed rivers.

WHAT: A Flurry of Changes: How climate shifts are impacting snowfall, glaciers, and the way we live, work and play in the Pacific NW

Featuring:

Dr. Anne Nolin, a snow hydrology specialist with Oregon State University
Dr. Andrew Fountain, a glacier specialist with Portland State University

WHEN: Wednesday, February 15
5:30 p.m. Reception with free refreshments and light appetizers
6:15 p.m. Program begins

WHERE: KEEN Footwear, The Great Room
926 NW 13th Ave, #210
Portland, OR 97209

TO REGISTER: <http://flurryofchanges.eventbrite.com>
Space is limited, so please register.

About The Climate Trust

The Climate Trust is a 501(c)(3) nonprofit organization with over 10 years of carbon market experience. Our mission is to provide expertise, financing, and inspiration to accelerate innovative climate solutions that endure. In order to arrest the rise in greenhouse gas emissions and to avoid the most dangerous impacts of climate change, The Climate Trust works to accelerate project implementation, develop financing solutions, and establish a supportive policy environment in the renewable energy, agriculture, forestry, energy efficiency and transportation sectors.
